

Medication Storage Guideline

Medication	Storage Guideline	How Supplied/Usage Guide	Expiration
Bravelle [®]	Lyophilized powder may be stored refrigerated or at room temperature (3° to 25°C/37° to 77°F).	Use immediately after reconstitution. Discard unused material.	Printed on box and vial
Cetrotide 0.25 [®]	Store refrigerated, 2-8° C (36-46°F)	Prefilled syringe	Printed on box and PFS
Cetrotide 3mg [®]	Store at 25°C (77°F), excursions permitted to 15-30°C (59°-86°F)	Prefilled syringe	Printed on box and PFS
Crinone [®]	Store at room temperature 25°C (77°F)	Prefilled Applicator	Printed on box
Delestrogen [®]	Store at room temperature 25°C (77°F)	Already in solution, draw from vial with syringe	Printed on box and vial
Endometrin [®]	Store at 20°-25°C (68°-77°F), excursions permitted to 15-30°C (59°-86°F)	Use special Endometrium applicator to insert	Printed on box
Follistim Vials [®] 75iu/150iu	Upon dispensing, the product may be stored by the patient at 2–8°C (36–46°F) until the expiration date, or at or below 25°C (77°F) for 3 months or until expiration date, whichever occurs first.	Already in solution, draw from vial with syringe	Printed on box and vial
Follistim Cart [®] 300/600/900	Upon dispensing, the product may be stored by the patient at 2–8°C (36–46°F) until the expiration date, or at 25°C (77°F) for 3 months or until expiration date, whichever occurs first. Once the rubber inlay of the Follistim [®] AQ Cartridge has been pierced by a needle, the product can only be stored for a maximum of 28 days at 2–25°C (36–77°F).	Already in solution, use Follistim Pen with pen needles	Printed on box and pen device
Ganirelix	Store at 25°C (77°F), excursions permitted to 15-30°C (59°-86°F)	Prefilled syringe	Printed on box and PFS
Gonal-f 75 [®]	Lyophilized vials may be stored refrigerated or at room temperature (2°-25°C/36°-77°F).	Use immediately after reconstitution. Discard unused material.	Printed on box and PFS
Gonal-f RFF Pen [®] 300/450/900	Upon dispensing, the patient may store the pen refrigerated (2°-8°C/36°-46°F) until the expiration date, or at room temperature (20°-25°C/68°-77°F) for up to three months or until the expiration date, whichever occurs first. After the first injection, the pen may be stored refrigerated (2°-8°C/36°-46°F) or at room temperature (20°-25°C/68°-77°F) for up to 28 days. Discard unused material after 28 days.	Prefilled pen device	Printed on box and pen device
Gonal F 450/1050 MD Kit [®]	Lyophilized Multi-Dose vials may be stored refrigerated or at room temperature (2°-25°C/36°-77°F). Following reconstitution, the Multi-Dose vial may be stored refrigerated or at room temperature (2°-25°C/36°-77°F). Discard unused reconstituted solution after 28 days.	Inject syringe containing diluent into the vial containing the lyophilized medication.	Printed on box, vial and syringe

This sheet should be used as a reference only and a pharmacist consultation should be sought if storage falls outside noted parameters.

Medication	Storage Guideline	Mixing Guideline	Expiration
hCG/Novarel®/Pregnyl®	Store at controlled room temperature 15°-30°C (59°-86°F)	After reconstituted, solution stable in refrigerator for 60 days	Printed on box and vial
Leuprolide/Lupron®	Store at room temperature 25°C (77°F)	Refrigerate after puncture	Printed on box and vial
Luvaris®	Vials may be stored refrigerated or at room temperature (2°-25° C / 36°-77° F).	Use immediately after reconstitution. Discard unused material.	Printed on box and vial
Menopur®	Lyophilized powder may be stored refrigerated or at room temperature (3° to 25°C/37° to 77°F).	Use immediately after reconstitution. Discard unused material.	Printed on box and vial
Ovidrel®	Patients should store the prefilled syringe refrigerated to allow the product to be used until the expiry date shown on the syringe or carton. The Ovidrel® PreFilled Syringe may be stored by the patient for no more than 30 days at room temperature (up to 25°C (77°F) but must be used within those 30 days.	Prefilled syringe	Printed on box and prefilled syringe
Progesterone in Sesame	Store at controlled room temperature 15°-30°C (59°-86°F)	Draw from vial with syringe	Printed on box and vial
Prometrium®	Store at 25°C (77°F), excursions permitted to 15-30°C (59°-86°F)	Capsule	Printed on pharmacy label.
Repronex®	Lyophilized powder may be stored refrigerated or at room temperature (3° to 25°C/37° to 77° F).	Use immediately after reconstitution. Discard unused material.	Printed on box and vial

Compounded Medications	Storage Guideline	Mixing Guideline	Expiration
Ganirelix SD vial 125mcg	Refrigerate	Single dose vial	30 days
Mic HCG	Refrigerate	Multi dose vial	30 days
Mic Leuprolide	Refrigerate	Multi dose vial	30 days
Mic Lupron	Refrigerate	Multi dose vial	30 days
Mic Ovidrel	Refrigerate	Multi dose vial	14 days
Prog Ethyl Oleate	Room temperature	Multi dose vial	3 months
Prog Cottonseed	Room temperature	Multi dose vial	6 months
Prog Olive Oil	Room temperature	Multi dose vial	6 months
Prog Vag Supp	Refrigerate	Suppository	6 months
Prog Vag Caps (Dry)	Room temperature	Gelatin capsule	6 months
Prog Vag Caps (Oil)	Refrigerate	Gelatin capsule	4 months
